Native Plant Propagation Event

August 9, 2019 9:00 – 11:30 AM
Solano Resource Conservation District Nursery, Dixon CA

Solano Resource Conservation District is going to hold a native plant propagation event at their nursery in Dixon. Volunteers are needed to help seeding out plug flats of wildflowers (goldenrod, mugwort, aster, gumplant) and sedges (slender sedge, Santa Barbara). All of these will be planted this winter at restoration sites near Dixon, Vallejo, and Rio Vista." 

The District will provide gloves and all necessary tools as well as cold drinks and snacks. Please RSVP to katherine.holmes@solanorcd.org if you would like to volunteer, and she will send you a map to the Solano RCD nursery location.
