New Calflora Tools for CNPS Users

Friday, March 6 at 6:30 pm, Rush Ranch, Solano Land Trust – Presentation/Discussion
Saturday, March 7, 9 am to Noon, Rush Ranch - Data Collection Hike

Join Calflora Executive Director Cynthia Powell to discuss new tools for CNPS Calflora users. Calflora’s plant database hosts over 2 million plant occurrences, some of which come directly from Willis Linn Jepson CNPS members. Cynthia covers Calflora’s new iNaturalist data feed, plant photo project, planting guide, population monitoring tools, email alerts, and speaks about the uses of Calflora for CNPS chapters. She is interested to know how Calflora can better serve the Willis L. Jepson CNPS Chapter and to answer any of your questions.

This free event is at Rush Ranch in the Nature Center, 3521 Grizzly Island Road, Suisun, CA 94585. To reserve your spot email k.catton@comcast.net with names, affiliation (if one), which event you would like to attend.

Cynthia Powell’s bio: After 3 years as Calflora’s GIS Project Manager, Cynthia is now Calflora’s Executive Director. She graduated with her MS in GIS (Geographic Information Science and databases) in 2010 forecasting Mokelumne River water supply based on MODIS remote sensing snow pack images. She’s been examining what was under that snow — plants — ever since. She now coordinates all Calflora programs, research, outreach, and advocacy, as well as fundraising and project management.

The Mission of Solano Land Trust is to protect land to ensure a healthy environment, keep ranching and farming families on their properties, and inspire a love of the land. solanolandtrust.org
